## PROJECTS

**Netflix & Chilled Cocktails** | <https://github.com/darrindevs/netflix-and-chilled-cocktails> | <https://darrindevs.github.io/netflix-and-chilled-cocktails>

Developer

- This project demonstrates the use of event listeners, local storage, multiple external api requests, and direct DOM manipulation. This app was a collaborative project.
- JavaScript, 3rd Party APIs, HTML, CSS

**Weather Dashboard** | <https://github.com/darrindevs/weather-dashboard> | <https://github.com/darrindevs/weather-dashboard>

Developer

- This browser based application leverages the OpenWeatherMap API to consume weather data based on user input. The user request updates the query parameters to return various weather data points for a selected city. The third-party API returns the data and the app uses JavaScript to dynamically insert the contents in the HTML.
- JavaScript, 3rd Party APIs, HTML, CSS

## EDUCATION

- B.S. / History / University of California, Santa Cruz
- Certification / Wilderness First Responder
